STEVEN THURLOW

Hello, my name is **Steven Thurlow**, and I am a software developer. You can contact me through the following methods:

Phone	+61420308076
Email	steven@sthurlow.com
Twitter	@stoive

EMPLOYMENT ELIGIBILITY

- I was born on **18 March 1988**
- I am an **Australian** and **British** citizen
- I am based in **Sydney, Australia**.

SKILLS SUMMARY

- **Microsoft .NET development** (C#, ASP.NET, MVC 2/3.5/4, WCF)
- **Web development**, (HTML5, JavaScript, EcmaScript 5, CSS3, AJAX, mobile and touch, rich web applications)
- **Frameworks** including web (jQuery, Underscore, Require.js, Backbone, Socket.IO, Node.JS) and .NET (ASP.NET MVC, Entity Framework, Enterprise Library, MSTest)
- **Backend development** for websites and banking systems
- Development **tools** (Git, Mercurial, TFS, SVN)
- **Databases** (MS SQL Server, Oracle, Neo4j, CouchDB, Redis)
- Development **methodologies** from agile (Extreme Programming, Scrum) to waterfall
- Some small adventures in **Java**
- Software development on **Windows** and **Unix** platforms
- **Software community engagement** including conferences like Web Directions, NodeConf, and syd.js, and events including Music Hack Day, BizSpark AppFest

PERSONAL INFO

My personal interests include: music, collecting records, going to concerts, hiking, good beers and coffee, and making software in my own time for fun or profit.

GOALS

I am looking for employers who can offer me the following:

- To be surrounded by great developers and colleagues who strive to do better
- To be somewhere enjoyable, challenging and engaging

CODE EXAMPLES

I have some examples of my code online:

- My home page <http://sthurlow.com/> is a nice example of an AJAX-y single-page web application which you can 'View Source' on
- My GitHub account <https://github.com/stoive> has a handful of projects in various stages of completion

I also have examples of work from previous jobs which I can demonstrate upon request.

EMPLOYMENT HISTORY

.NET and JavaScript Developer, CSC Healthcare (October 2012 - Current)

- C# and JavaScript development to create a next-generation tablet-based web application
- Directed the web architecture and browser-side framework decisions to support a highly performant, responsive and reliable web app
